MEMORANDA.

Population.—The latest estimate of the population shows that during the first three months of 1910 the total increase was 10,386, or at the rate of 2·5 per cent. per annum. Of this increase, 6,882 was due to excess of births, and 3,504 to excess of immigration.

Trade.—The imports during April were valued at £3,163,245, which shows an increase of £985,833, as compared with the corresponding month of last year. For the four months there was an increase of £1,569,031, or over 15 per cent., as compared with last year. The direct oversea imports during April amounted to £1,803,904, as compared with £1,239,169 in 1909; the total for the four months was £7,167,837, an increase of £865,810 over the corresponding figures for 1909. There were increases in most of the principal articles—apparel and soft goods, agricultural implements, iron and steel, kerosene, tobacco, &c.

The oversea exports for April amounted to £2,057,312, being an increase of £1,020,923, or over 98 per cent., compared with the corresponding month of last year. For the three months there was an increase in the oversea exports of £2,483,907, or over 29 per cent., as compared with last year.

Principal increases during the three months were—					£
Wool	984,388
Wheat	851,625
Butter...	296,272
Meats	120,296
Minerals	108,404
Skins	47,708

Separating merchandise from gold, the exports of the former during the four months increased by £2,528,616, and the latter decreased by £44,709.

Public Finances.—The Public Accounts for April show that the net revenue for the month was £1,325,922, or £169,393 more than in April of last year. During the ten months ended 30th April the revenue was £11,546,718, being £238,342 more than the corresponding period of the last financial year.

Principal increases during the ten months were—				£
From Railways and Tramways	280,816
„ Water and Sewerage Rates	37,567
Principal decreases during the same period were—				£
Commonwealth Revenue	64,760
Taxation	59,695
Lands	75,594

The expenditure during April was £1,358,572, an increase of £151,393, as compared with April of last year. During the ten months the expenditure was £11,334,617, being £107,499 more than in 1908-9.

Principal increases during the ten months were—				£
Business Undertakings	362,539
Interest Repayments	61,015

Expenditure on Government Departments decreased by £251,503.

On the 30th April, 1910, the Consolidated Revenue Account was in credit to the amount of £208,192.

Railways.—The report on Railways for the quarter ended 31st March shows satisfactory results. Compared with the corresponding quarter of last year, the earnings show an increase of £189,210, and the expenditure an increase of £127,065, due largely to flood repairs on the North and North-west lines, to heavier repairs, to renewals of rolling-stock, and to higher rates paid to the staff under awards of Wages Boards. Relatively the earnings increased by 7½d. per train mile, and the expenditure by 5½d. per train mile.

Banks of Issue.—The banking averages for the quarter ended 31st March show that the current accounts increased by £2,129,200 during the quarter. Compared with the corresponding period of last year, there has been the large increase of £3,021,326 in current accounts, while deposits as a whole increased by £3,360,843. Reserves of coin and bullion were £1,884,981 more. Advances decreased by £1,946,381 during the quarter, and during the year by £760,863.

Mineral Production.—The value of the minerals—silver, copper, tin, and coal—exported from New South Wales during the first quarter of 1910 was £821,235, a decrease of £173,037 as compared with the corresponding quarter of 1909. The output from the silver-lead mines, and the exports of copper and tin, show substantial increases compared with the first quarter of 1909; but, as a result of the strike, the exports of coal show a decrease of 762,274 tons, and £355,831 in value.

The gold yield during April was 15,381 oz. crude, equal to 12,277 oz. fine, valued at £52,149. The value of gold produced during the four months was £269,544, and showed a decrease of £12,869, as compared with the corresponding period of 1909.

Prices.—The general index number for April was lower than in March, but higher than for the corresponding month of last year. The index number for pastoral produce was 1,186, for metals 1,120, and for all articles 1,194. Prices during the month were generally below those ruling in March; the principal articles to show a decline in value were butter, greasy wool, leather, and copper; but scoured wool, silver, and tin advanced in price.

Meteorology.—During the month of April dry conditions were experienced over the greater part of New South Wales, about one-third having practically no rainfall. The divisions most severely affected were the Western, Central Western Plain, Riverina, and the Slopes. On the North Coast, however, the conditions were in marked contrast, as the falls recorded were greatly in excess of the average.

Land Selections.—During April 129 new settlers applied for 76,123 acres; and 49,036 acres, representing 72 blocks, were set apart for residential settlement. Since the beginning of the year the number of new settlers has been 675, and the area applied for 394,507 acres. The original area set apart for residential settlement since the 1st January has been 339,927 acres, representing 469 blocks.

NOTE.—It will be observed that the net receipts from Reproductive Services were almost sufficient to pay the interest on the whole of the Public Debt. The result of the working of Partly Productive Services and of Public Buildings, &c. (either net receipts or net expenditure), is not given, as the figures cannot be ascertained satisfactorily. It must be remembered, however, that these works have been of great service in helping the development of the State, and without them the Reproductive Services would not show so high a return.
